Special Note

Each October, NASS considers revisions to planted and harvested acreage for canola, corn, dry edible beans, sorghum, soybeans, sugarbeets, and sunflower. Updates are based on all available data, including the latest certified acreage data from the Farm Service Agency (FSA). All States in the estimating program for these crops were subject to review and updating.

NASS previously reviewed corn, sorghum, soybeans, and sugarbeets in September due to the completeness of this season's data for these crops and published updates at that time. No additional changes were made for corn, sorghum, or soybeans this month.
